

“wine is the most civilized
thing in the world.”

ernest hemingway

Our still and sparkling wines are preserved
by the 'Le Verre de Vin' preservation unit.
This specialised unit allows us to be confident
that every glass of wine or champagne is served
to you, fresh and in perfect condition every time.

The still wine system uses a vacuum and seal to
keep the wine from oxidising and keeping it
totally fresh and true to it's original character.

For Sparkling wine, a cap of CO2 gas is
inserted into the bottle to make every
reopening as fresh as the first.
